A LEVEL BUSINESS

A Guide to A-level Business/Preparation for September

Business A-level Course Outline

Examination Board: [AQA Business 7132](#)

About the course

Business is a popular academic course that is firmly grounded in the reality of the dynamic business environment. You will learn subject content alongside real business events such as the global recession, the BP Deepwater Horizon oil spill and the leadership of great entrepreneurs such as Lord Sugar and Sir Richard Branson to bring theory to life. As well as looking at fundamental business functions such as human resources, marketing, finance etc. there is a newer focus on digital technology and e-commerce, international business, globalisation and business ethics. It is what you read and hear about in the news, backed by up-to-date case studies to bring the subject to life.

Entrance requirements

Standard entry requirement for entry onto A level programmes of study is 6 GCSEs at Grade 4 or above including maths and English, with a Grade 5 in English strongly recommended. Preparation for September

Please complete all work on lined paper (or word process) making sure your name is clearly marked at the top of each sheet. Please bring with you to your first lesson in September.

Section 1: Costs, Revenue and Profit

Calculating costs, revenues and profits are part of decision making to improve financial performance. To help you understand the fundamentals of how these concepts are calculated, read the information below and complete the corresponding activities.

Key Terms and Calculations

Key Term	Definition	Calculation
Selling price	The amount that a customer pays in order to receive goods or services	
Revenue	The total amount of money earned by a business from selling its goods or services	Revenue = selling price x number sold
Fixed cost	Costs that do not change with level of output. Also known as overheads or indirect costs.	Total fixed costs = all fixed costs added together
Variable cost	Costs that change with level of output. If output increases the total variable costs will increase. Also known as direct costs.	Total variable cost = variable cost per unit x output
Total cost	The sum of all the costs added together	Total costs = fixed costs + variable costs
Profit	The amount of money left from revenue once all costs have been deducted. If the revenue is greater than the total costs the business has made a profit. If it is lower they have made a loss.	Profit = revenue – total costs

Simone's Sandwich Shop is a small business based in Suffolk which supplies sandwiches and homemade cakes to employees of local firms. They also sell to people who are passing by the shop and businesses that do not have the facilities to cater for meetings or events they are holding. The business will serve approximately 80 customers each day who each spend around £3.75. The business spends on each customer around £0.40 on raw materials, £0.70 on wages and £0.15 on energy for each one served. The weekly costs are £225 for rent, £35 insurance, £50 business rates and salary £325. The business opens for five days a week.

1. Calculate the revenue achieved by Simone's Sandwich Shop during one week of trading (3 marks)
a. £3.75 x 80 (customers) = £300 per day
£300 x 5 (days) = £1,500 per week
2. Calculate the total variable costs per week of Simone's Sandwich Shop (4 marks)
a. £0.40 (raw materials) + £0.70 (wages) + £0.15 (energy) = £1.25 per customer
£1.25 x 80 (customers) = £100
3. Calculate the total weekly costs of Simone's Sandwich Shop (4 marks)
a. Fixed costs = £225 (rent) + £25 (insurance) + £50 (business rates) + £325 (salary) = £625
Total costs = £625 (total fixed costs) + £500 (total variable costs) = £1,125 total costs per week.
4. Calculate the weekly profit or loss of Simone's Sandwich Shop (2 marks)
a. £1500 (revenue) - £1125 (costs) = £375 weekly profit
